

New Records of Two Lamiine Species (Coleoptera, Cerambycidae) from Taiwan

Michiaki HASEGAWA¹⁾ and Yu-Long LIN²⁾

¹⁾ Toyohashi Museum of Natural History, 1-238 Oana, Oiwa, Toyohashi, 441-3147 Japan

²⁾ No. 31, Alley 38, Lane 120, Bangka Blvd., Wanhua District, Taipei City 10862, Taiwan

In the recent field survey by the junior author, LIN was able to collect two unrecorded lamiine species from Taiwan. They are determined as *Apomecyna semihistrio* KUSAMA et TAKAKUWA, 1984, and *Cylindilla makiharai* HASEGAWA, 1992.

Apomecyna semihistrio KUSAMA et TAKAKUWA, 1984

Apomecyna semihistrio KUSAMA et TAKAKUWA, 1984, 11, pl. 54, figs. 390, 390a; type locality: Omoto, Ishigaki Is., Japan.

Specimens examined. 2 ♂♂, 2 ♀♀, Sindian City, Taipei County, 17-V-2003, Y.-L. LIN leg.; 1 ♀, Pihu, Pinglin Township, Taipei County, Y.-L. LIN leg.; 1 ♀, Nanshanchi, Nantou County, 16-V-1983, M. HASEGAWA leg.; 1 ♂, 1 ♀, Pinher, Taiwu Township, Pintung County, 17-XI-2002, Y.-L. LIN leg.; 1 ♂, ditto, 9-XI-2002, Y.-L. LIN leg.

Distribution. Miyako-jima Is., Ishigaki-jima Is., Iriomote-jima Is. and Yonaguni-jima Is. (Ryukyus, SW. Japan); Taiwan (new record).

Cylindilla makiharai HASEGAWA, 1992

Cylindilla makiharai HASEGAWA, 1992, 37, figs. 1, 3, 5, 7-9; type locality: Suda-rindô, Ishigaki-jima Is., Japan.

Specimens examined. 1 ♀, Mt. Dahan Shan, Chunrih Township, Pintung County, 27-V-2003, Y.-L. LIN leg.; 1 ♂, ditto, 21-V-2007, W.-S. LIN leg.

Distribution. Ishigaki-jima Is. and Iriomote-jima Is. (Ryukyus, SW. Japan); Taiwan (new record).

Note. The Taiwanese specimens examined have somewhat darker and slenderer body than that of Ishigaki-jima Is., Ryukyus, but there is no difference in male genitalia between the specimens from these two localities.

We thank Dr. Tatsuya NIISATO (Bioindicator Co., Ltd., Tokyo) for his kind help.
